

Hi,

I am really saddened to see that the FCC has to try to censor satellite radio. I pay an extra \$10 bucks a month for XM and love. The instant traffic and weather were great when we visited Florida a few months ago. I didn't have to hunt and peck for a radio station all I had to do was change my xmradio dial and it is on 24 hours a day 7 days a week unlike a lot of news radio where you have to wait through many commercials.

Please reject petition 04-160 it doesn't make any sense to censor XM radio.

Sincerely,

Jeff Poyser
